

DE 140 Polar / DE 140 Q Polar In-Wall / In-Ceiling Speaker

Description

The smallest model in the Polar® speaker series is a two-way speaker with compact dimensions and a large linear frequency spectrum. Music and speech are dynamically reproduced with exceptional clarity. Thanks to optimum omnidirectional dispersion characteristics, sound is distributed evenly throughout the space, even with just a few speakers.

The DE 140 Polar is comprised of three parts. First, the elegant installation frame is mounted in the ceiling or wall. The speaker unit and the magnetic front grille are then installed. This enables reliable installation and retrofitting, even for complicated installation scenarios.

In spaces with different interior designs, the DE 140 Polar can be combined with the DE-X 140 Polar, DA 250 Polar and FZ 140 Polar models to create homogeneous sound systems.
